

COIN

Unique ID: NLM-79C792

Object type certainty: Possibly

Workflow status: Awaiting validation

Copper alloy possible coin fragment. A probably milled copper alloy flan, of the size of a small farthing or late sixpence of George III (1760-1820) or later, halved, and pierced with a hole of diameter 3.4mm set towards one edge. Traces of an outer circle appear on both sides. What this surrounded is uncertain on one side; the other side bears the words HONI SOIT [--], suggesting Arms within a Garter band may have appeared, presumably as a reverse motif (cf. the 1816 sixpence of the New or Last Coinage of George III). This might also be apt to a gaming counter of the same reign, modelled on a gold coin. Suggested date: Post-Medieval, 1816-1820

Diameter: 18.8mm, Weight: 0.97gms

Subsequent actions

Subsequent action after recording: Returned to finder

Chronology

Broad period: POST MEDIEVAL

Period from: POST MEDIEVAL

Period to: POST MEDIEVAL

Date from: Circa AD 1760

Date to: Circa AD 1820

Dimensions and weight

Quantity: 1

Weight: 0.97 g

Diameter: 18.8 mm

Discovery dates

Date(s) of discovery: Tuesday 2nd April 2019

Personal details

This information is restricted for your access level.

Other reference numbers

Other reference: NLM42646

Materials and construction

Primary material: Copper alloy

Manufacture method: Milled

Completeness: Fragment

Spatial metadata

Region: [Yorkshire and the Humber](#) (European Region)

County or Unitary authority: [North Lincolnshire](#) (Unitary Authority)

District: [North Lincolnshire](#) (Unitary Authority)

To be known as: High Burnham

Spatial coordinates

Grid reference source: Centred on field

Unmasked grid reference accurate to a 0.01 metre square.

Discovery metadata

Method of discovery: Metal detector

General landuse: Cultivated land
